

# Isn't It About Time . . .

- ☒ . . . to Upgrade your Facility?
- ☒ . . . to Improve your System Reliability?
- ☒ . . . to Reduce your Energy Costs?
- ☒ . . . to Use your Utility's Rebate Programs?
- ☒ . . . to Do all this with NO Out-of Pocket Cost?

## Then take advantage of our **4.5%\* LOANS !**

.....

Unsure of what **efficiency measures** would most benefit your facility? You may qualify for up to **\$10,000 in no cost technical assistance** to help you determine what projects would provide the best energy-savings payback.

Many experts foresee **Energy Costs** on the rise in the future. If your facility is not as **efficient** as it should be, you are wasting thousands of dollars on electricity and natural gas costs. These loan and assistance programs can help to improve your facility's efficiency through:

- Energy audits
- Feasibility studies
- Motors and pumps upgrades
- Automated energy management systems
- Building envelope and lighting retrofits
- Heating and air conditioning improvements, and
- Other energy use reduction projects

( \* or current rate )

"By partnering with the Commission we were able to turn waste gas into electricity!

I would recommend their technical and financial assistance to any facility needing to implement an energy efficiency project."

Mike Thornton, P.E.  
General Manager,
